**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 23 April 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Response to Amendment*

Amendment filed on 4/23/08 has been entered.

Claims 1, 3-4, 13-14, 17 are present for examination.

Claims 2, 5-12, 15-16, 18-20 are cancelled.

Applicant's arguments filed on 4/23/08 have been fully considered but are not persuasive.

Therefore, claims 1, 3-4, 13-14, 17 are rejected in the new ground rejections as set below.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-4 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Mickley (WO 02/11807) (cited from IDS).

Mickley discloses an injection catheter comprising: a first elongated shaft 420; a first lumen 428; a needle 430; a stop collar 476, 478 disposed within the first lumen and near the distal end of the needle; a first set of threads 464; a second set of thread 454; wherein the rotation of the needle within the first elongated shaft; the positioning of the stop collar within the first elongated shaft; a plurality of outwardly protrusions 478; a plurality of grooves (Fig. 6); a first elongated shaft including a reinforcement member with a braid (page 5, lines 5-6). It is noted that a first elongated shaft 120 of Fig. 1-2 is different embodiment with the first elongated shaft 420 of Fig. 6. However, the material of the elongated shaft 420 is able to made same material with elongated shaft 120.

Art Unit: 3763

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mickley.

Regarding claims 13-14, Mickley discloses the claimed invention except for the shaft made of a low friction material such as polytetrafluoroethylene. It would have been obvious to one having ordinary skill in the art at the time the invention was made to an elongated shaft made of low friction material such as polytetrafluoroethylene, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. It is well-known in the art to provide a low friction material to easy insert the catheter into the body.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
